AMENDMENTS TO THE ABSTRACT

Please replace the Abstract with the following replacement Abstract:

[[A]]Provided is a method for generating a feedback message for ARQ, the method including[[:]] [[a)]] recording an ACK type in a first field; [[b)]] estimating the last block sequence number of successively ACKed blocks and recording the estimated last block sequence number in a second field; [[c)]] recording the number of groups of successively ACKed blocks after the estimated last block sequence number estimated in b) as the number of ACK MAPs in a third field; [[d)]] recording the startblock sequence number of the respective ACK MAPs in a fourth field; [[e)]] recording the lengths of the respective ACK MAPs in a fifth field corresponding to the recorded start block sequence number in d); and [[f)]] sending a feedback message including information on the first to the fifth fields.
